

CARTON WITH DISPENSER

Abstract of the Disclosure

A package includes an article group formed of cylindrical articles disposed on their sides in a side-by-side parallel fashion, and a carton disposed around the group. The carton includes a top wall, opposed side walls, end walls and an article dispenser. The side walls are disposed alongside the ends of the articles while one end wall is disposed adjacent to the side wall of an endmost article. The dispenser is formed from the end and top walls and includes at least one retaining panel to hold all the articles in the carton until removed by the user.
